

EXPERIMENT 31: CREATE A WEB BLOG USING WORDPRESS

Aim

To create a web blog using WordPress and demonstrate HTML elements such as the Anchor Tag, Title Tag, Heading Tag, Paragraph Tag, Image Tag, and List Tag.

Objective

- To understand the basic structure of a webpage.
- To create a simple blog using WordPress.
- To demonstrate HTML tags.
- To create hyperlinks using the Anchor Tag.
- To understand the purpose of the Title Tag and Heading Tags.

Algorithm

1. Open WordPress.
2. Create a new blog or website.
3. Select an appropriate theme.
4. Create a new page or post.
5. Enter the title of the blog.
6. Add headings and paragraphs.
7. Insert images.
8. Add hyperlinks using the Anchor Tag.
9. Add ordered or unordered lists.
10. Preview the blog.
11. Publish the blog.

<h2>AI Topics</h2>

Machine Learning

Natural Language Processing

Computer Vision

Expert Systems

<h2>Conclusion</h2>

<p>

Artificial Intelligence is widely used in modern applications and intelligent systems.

</p>

</body>

</html>

Tags Demonstrated

Tag	Description
------------	--------------------

<html>	Defines the HTML document
--------	---------------------------

<head>	Contains webpage information
--------	------------------------------

<title>	Defines the webpage title
---------	---------------------------

<body>	Contains visible webpage content
--------	----------------------------------

<h1>	Defines the main heading
------	--------------------------

<h2>	Defines a subheading
------	----------------------

<p>	Defines a paragraph
-----	---------------------

<a>	Creates a hyperlink
-----	---------------------

	Creates an unordered list
------	---------------------------

	Defines a list item
------	---------------------

	Inserts an image
-------	------------------

Output

Artificial Intelligence Blog

Introduction to Artificial Intelligence

Artificial Intelligence is a branch of computer science

that deals with creating intelligent systems.

Useful Link

Visit Google

AI Topics

- Machine Learning
- Natural Language Processing
- Computer Vision
- Expert Systems

Conclusion

Artificial Intelligence is widely used in modern applications and intelligent systems.

Result

A web blog was successfully created using WordPress and the required HTML elements were demonstrated.

Conclusion

Thus, a simple web blog was successfully created using WordPress, demonstrating the Anchor Tag, Title Tag, Heading Tag, Paragraph Tag, and List Tags.
